

Federal “Office IT” Specialist

Personal computing, networked printing, and unified A/V conferencing systems are the core technologies that drive how effectively end users in any organization work and communicate ... from anywhere..

The process of selecting, configuring, acquiring, and managing these endpoint systems can be time consuming, and CIOs / CISOs now view these endpoints as a leading cybersecurity vulnerability.

ABM Federal is committed to understanding and helping our Federal clients better navigate the ever-changing technology and cyber threat landscape. We provide objective intel and advice, reduce procurement friction, and leverage our technical knowledge and industry partnerships to deliver high-impact solutions and an overall experience that prioritizes security and performance.

"Technology for Today's Collaborative Work Environment"

Office IT - Areas Of Focus

Personal Systems

Choose from a wide range of Thin Client / Mini / Desktop PC's, Notebooks, Tablets, Power Workstations and accessories.

Print / Scan Hardware

Solutions ranging from desktop to enterprise workgroup-class devices, including large production-class devices across multiple OEM manufacturers.
